

Timothy Tran

Technical Support Engineer | Solutions Engineer | SaaS · Healthtech · Martech

San Diego, CA • (714) 468-9490 • timtk21@gmail.com • [LinkedIn](#) • [GitHub](#)

Technical platform support professional with 5+ years bridging complex life sciences platforms and cross-functional teams. Certified in Google Analytics and Adobe Analytics with hands-on GTM implementation and DataLayer architecture experience — and deep domain expertise in genomics and biotech that is a rare differentiator when supporting SaaS customers in health, life sciences, and data-intensive industries.

Core Competencies & Technical Skills

Web Technologies & JavaScript: HTML · CSS · JavaScript (ES6+) — actively building depth through Udemy: The Complete JavaScript Course 2025, freeCodeCamp, codeWars, and The Modern JavaScript Tutorial

Core Skills: Technical Troubleshooting & Root Cause Analysis · Cross-Functional Collaboration · Platform Lifecycle Support · Client & Stakeholder Communication · Training & Technical Enablement

Analytics	Google Analytics 4 (GA4) · Adobe Analytics · Google Tag Manager (GTM) · DataLayer / Event Tracking · GA4 DebugView · SQL
Web & Dev	JavaScript (ES6+) · HTML / CSS · DOM Manipulation · Chrome DevTools · REST APIs / JSON
Tools & Workflow	Jira · Confluence · Git / GitHub · Postman · Zapier

Projects

Personal Resume Site • <https://itsstim.github.io/webResume/> • 2026

- Architected a full GA4 analytics and automation stack on a live website using Google Tag Manager — designing a custom DataLayer schema with event parameters for form submissions, file downloads, and scroll depth tracking
- Engineered a client-to-storage data pipeline routing contact form PII (name, email, phone) to Google Sheets via Google Apps Script, resolving GA4's inherent limitation of not retaining raw user-identifying data
- Automated lead notification via Zapier — monitoring Google Sheets for new submissions and triggering a formatted email with full contact details for immediate follow-up
- Instrumented live site with Segment source tracking across four custom events (page, project_link_clicked, resume_pdf_downloaded, contact_form_submit); configured GA4 and webhook destinations, evaluating redundancy against existing GTM implementation

E-commerce Site • https://itsstim.github.io/Ecommerce_Project/ • 2026

- Deployed a full-funnel GA4 ecommerce measurement protocol (view_item through purchase) on a custom-built static storefront, utilizing a centralized DataLayer for dynamic event tracking
- Engineered a dynamic DataLayer schema to capture complex item-level data, ensuring 1:1 alignment with GA4 Monetization reports
- Produced technical deliverables including a DataLayer schema specification, tag-to-trigger mapping, and audit report validating data integrity across all funnel stages

CDP Event Stream Simulator • <https://itsstim.github.io/CDPEventStreamSim/> • 2026

- Architected a browser-based event simulator generating structured JSON payloads (view_item, add_to_cart, sign_up, cta_click) aligned Segment/Tealium event schema conventions — each payload includes event name, ISO timestamp, user ID, and typed contextual properties
- Built a real-time event log panel via DOM manipulation rendering live payload output, enabling schema validation and event inspection
- Configured a Node/Express ingestion endpoint deployed to Render — accepting event payloads via POST, storing them in server-side memory, and exposing a GET route for payload retrieval; implemented dynamic API base switching between local and production environments
- Integrated Segment Analytics.js into the simulator; implemented track and identify calls demonstrating CDP identity resolution — associating anonymous sessions with a userId on sign-up — and validated payloads through Segment's event debugger

Work Experience

Singular Genomics • San Diego, CA • 11/2020 - 2/2025

Senior Research Associate / Engineer

- Led technical validation and onboarding for Early Access Program (EAP) clients, designing testing frameworks and validation protocols that ensured product stability and performance ahead of market launch
- Served as the primary technical liaison between end-users and Engineering, providing hands-on support while translating user-reported bugs and feature requests into structured, actionable tickets
- Built and delivered a user training program covering NGS and spatial sequencing platforms, created documentation that reduced user error rates across internal and external teams
- Acted as the subject matter expert during product demonstrations for marketing and commercial stakeholders, communicating complex technical capabilities to technical and non-technical audiences
- Coordinated cross-functional workflows spanning Engineering, Field Applications, Manufacturing, and Commercial teams for a multi-site EAP rollout — managing timelines, escalations, and stakeholder communication

Research Associate II

- Provided hands-on technical troubleshooting for legacy and commercial platforms, maintaining high availability for 5+ concurrent internal project teams
- Collaborated with developers to optimize data management workflows and analysis pipelines, resulting in a measurable reduction of false-positive sequencing errors

Research Associate

- Conducted deep-dive technical analysis on core platform components to identify opportunities for performance improvement, increasing data accuracy and operational efficiency
- Refined and documented critical data processing workflows, reducing error rates and improving overall quality standards across the platform

Crown Bioscience • San Diego, CA • 09/2019 – 10/2020

Research Associate

- Analyzed and interpreted complex multi-variable datasets, producing clear and actionable technical reports for cross-functional stakeholders
- Managed independent research projects end-to-end, coordinating across internal teams to meet deadlines and deliverable goals

Mosaic Laboratories • Lake Forest, CA • 01/2018 – 08/2019

Logistics Technician

- Managed scheduling and client communications for key accounts, ensuring timely project delivery and maintaining strong client relationships

Education

Bachelor of Science in Human Biology - University of California, San Diego
