San Diego, CA • (714) 468-9490 • timtkt21@gmail.com • LinkedIn • GitHub

Technical Implementation & Solutions Engineering | Martech/CDP | Life Sciences Technology

Implementation-focused professional with hands-on GA4, Google Tag Manager, and Segment implementation spanning three live projects, with supervised Tealium iQ work and Adobe Analytics reporting. Brings 4+ years of technical experience supporting NGS and spatial multiomics platforms, including leading validation and onboarding frameworks for new platform rollouts across two early-access sites. Skilled at end-to-end troubleshooting, root-cause isolation, cross-functional collaboration, and translating technical issues into actionable solutions for engineers and end users.

Core Competencies & Technical Skills

CDP & Data	Segment (Analytics.js, track/identify, identity resolution) • Hightouch (Academy) • SQL • REST APIs / JSON • Postman
Analytics & Tagging	Google Analytics 4 (GA4) • Google Tag Manager (GTM) • Tealium iQ (working knowledge) • DataLayer / Event Tracking • GA4 DebugView • OMNIBUG • Adobe Analytics (Foundations; reporting exposure via mentorship)
Web & Dev	JavaScript (ES6+) • Node / Express • HTML / CSS • Chrome DevTools • Git / GitHub • Google Apps Script
Tools & Workflow	Jira • Confluence • Zapier • Slack / Teams • Salesforce Trailhead (Admin beginner badges, intermediate in progress)
Core Skills	Troubleshooting & Root Cause Analysis • Client & Stakeholder Communication • Documentation • Training & Technical Enablement • Cross-Functional Collaboration

Work Experience

Professional Development

Career Transition • San Diego, CA • 02/2025-Present

- Self-directed training in JavaScript, SQL, Martech, and CDP platforms
- Built three projects (below) integrating GA4, Google Tag Manager, Segment CDP, dynamic data layers, e-commerce event tracking, and automated lead workflows to demonstrate end-to-end event instrumentation and identity resolution

Martech Implementation Mentorship • San Diego, CA • 02/2026-Present

Working under a senior engineer with 10+ years' experience

- Reviewed conversion tracking tags, load rules, and data layer values within tag management platforms (Segment, Tealium, GTM, etc.)
- Diagnosed and resolved a conversion tracking failure through hands-on debugging with browser-based tools
- Reviewed database and schema structure and studied SQL queries to understand data flow across systems

Singular Genomics • San Diego, CA • 11/2020 - 02/2025

Senior Research Engineer, Systems Integration • 03/2023 – 02/2025

- Led technical validation and onboarding for 2 Early Access Program (EAP) clients, designing testing frameworks and validation protocols that ensured product stability and performance ahead of market launch
- Served as a primary technical liaison between end-users and Engineering. Provided hands-on support and turned user-reported bugs and feature requests into actionable Jira tickets
- Coordinated Engineering, Field Applications, Manufacturing, and Commercial teams across a multi-site EAP rollout. Managed timelines, escalations, and stakeholder communication over Slack and Teams

- Built and delivered a user training program and documentation for NGS and spatial sequencing platforms, and was the subject matter expert in product demos for marketing and commercial teams

Research Associate II • 03/2022 – 03/2023

- Provided hands-on technical troubleshooting and stakeholder communication for legacy and commercial platforms, keeping 5+ concurrent internal project teams running and serving as the point of contact for escalations

Research Associate • 11/2020 – 03/2022

- Characterized core sequencing platform components and workflows, then documented and implemented changes that improved data accuracy and operational efficiency

Crown Bioscience • San Diego, CA • 09/2019 – 10/2020

Research Associate

- Managed independent research projects and coordinated across internal teams to deliver clear and actionable reports for clients on deadline

Mosaic Laboratories • Lake Forest, CA • 01/2018 – 08/2019

Logistics Technician

- Managed scheduling and client communications for key accounts, ensuring timely project delivery and maintaining strong client relationships

Projects

Personal Resume Site • https://itsstim.github.io/webResume/ • 2026

- Built GA4 analytics and automation stack on a live website using Google Tag Manager with a DataLayer schema for form submissions and file downloads
- Routed contact form data (name, email, phone) to Google Sheets via Google Apps Script keeping PII out of GA4 and Segment and automated lead notification via Zapier
- Set up Segment source tracking across four custom events (page, project_link_clicked, resume_pdf_downloaded, contact_form_submit) with GA4 and webhook destinations

E-commerce Site • https://itsstim.github.io/Ecommerce_Project/ • *2026*

- Deployed a GA4 E-commerce tracking (view_item through purchase) on a static storefront that uses a centralized DataLayer with item-level data matching 1:1 to GA4 Monetization reports

CDP Event Stream Simulator • https://itsstim.github.io/CDPEventStreamSim/ • *2026*

- Built a browser-based event simulator that generates JSON event payloads (view_item, add_to_cart, sign_up, cta_click) modeled on Segment/Tealium event schema conventions, backed by a Node/Express endpoint on Render that accepts POSTs and returns stored payloads on GET
- Integrated Segment Analytics.js with track() and identify() calls, validated in the Segment event debugger, to demonstrate CDP identity resolution by linking anonymous sessions with a userId on sign-up

Education

Bachelor of Science in Human Biology - University of California, San Diego

CERTIFICATIONS

Google Analytics, Adobe Analytics Foundations, Salesforce Trailhead (Admin Beginner badges; Intermediate in progress), HubSpot Inbound/Digital Marketing, Postman API Beginner, Postman API Testing
