Technical Implementation & Solutions Engineering | Martech/CDP | Life Sciences Technology
Implementation-focused professional with hands-on experience using Tealium, Google Tag Manager, Hightouch, and Adobe Analytics to deploy and debug tags, validate data layers, and support analytics workflows. Brings 4+ years of technical experience supporting NGS and spatial multiomics platforms, including leading validation and onboarding frameworks for new platform rollouts across multiple early-access sites. Skilled at end-to-end troubleshooting, root-cause isolation, cross-functional collaboration, and translating technical issues into actionable solutions for engineers and end users.

Core Competencies & Technical Skills

Analytics	Google Analytics 4 (GA4) • Adobe Analytics (Foundations) • Google Tag Manager (GTM) • DataLayer / Event Tracking • GA4 DebugView • SQL • Tealium iQ (working knowledge)
Web & Dev	JavaScript (ES6+) • HTML / CSS • DOM Manipulation • Chrome DevTools • REST APIs / JSON
Tools & Workflow	Jira • Confluence • Git / GitHub • Postman • Zapier • Segment
Core Skills	Technical Troubleshooting & Root Cause Analysis • Cross-Functional Collaboration • Platform Lifecycle Support • Client & Stakeholder Communication • Training & Technical Enablement

Work Experience

Singular Genomics • San Diego, CA • 11/2020 - 02/2025

Senior Research Engineer, Systems Integration • 03/2023 – 02/2025

- Led technical validation and onboarding for 2 Early Access Program (EAP) clients, designing testing frameworks and validation protocols that ensured product stability and performance ahead of market launch
- Served as a primary technical liaison between end-users and Engineering, providing hands-on support while translating user-reported bugs and feature requests into actionable tickets
- Built and delivered a user training program and documentation covering NGS and spatial sequencing platforms
- Acted as the subject matter expert during product demonstrations for marketing and commercial stakeholders
- Coordinated cross-functional workflows spanning Engineering, Field Applications, Manufacturing, and Commercial teams for a multi-site EAP rollout. Managed timelines, escalations, and stakeholder communication
- Managed technical issues via JIRA ticketing, providing support and communication to teams and users through mediums like Slack and Teams

Research Associate II • 03/2022 – 03/2023

- Provided hands-on technical troubleshooting and stakeholder communication for legacy and commercial platforms, maintaining high availability for 5+ concurrent internal project teams and serving as point of contact for escalations

Research Associate • 11/2020 – 03/2022

- Characterized core sequencing platform components and workflows to identify potential improvements; documented and implemented changes that improved data accuracy and operational efficiency

Crown Bioscience • San Diego, CA • 09/2019 – 10/2020

Research Associate

- Managed independent research projects and coordinated across internal teams to meet deadlines and deliver clear and actionable reports for clients

Mosaic Laboratories • Lake Forest, CA • 01/2018 – 08/2019

Logistics Technician

- Managed scheduling and client communications for key accounts, ensuring timely project delivery and maintaining strong client relationships

Projects

Personal Resume Site • https://itsstim.github.io/webResume/ • *2026*

- Built GA4 analytics and automation stack on a live website using Google Tag Manager. Designed a DataLayer schema with event parameters for form submissions and file downloads
- Routed contact form data (name, email, phone) to Google Sheets via Google Apps Script keeping PII out of GA4 and Segment and automated lead notification via Zapier for timely follow-up
- Implemented Segment source tracking across four custom events (page, project_link_clicked, resume_pdf_downloaded, contact_form_submit); configured GA4 and webhook destinations

E-commerce Site • https://itsstim.github.io/Ecommerce_Project/ • *2026*

- Deployed a GA4 E-commerce measurement protocol (view_item through purchase) on a static storefront that uses a centralized DataLayer for dynamic event tracking
- Created a dynamic DataLayer schema to capture item-level data on site ensuring 1:1 alignment with GA4 Monetization reports

CDP Event Stream Simulator • https://itsstim.github.io/CDPEventStreamSim/ • *2026*

- Built a browser-based event simulator generating structured JSON payloads (view_item, add_to_cart, sign_up, cta_click) aligned with Segment/Tealium event schema conventions
- Configured a Node/Express endpoint deployed to Render with features: dynamically switches API depending on local and production environment, accepts event payloads via POST, stores them in server-side memory, and exposes a GET route for payload retrieval
- Integrated and validated (via Segment event debugger) Segment Analytics.js into the simulator, implementing track() and identify() calls that demonstrate CDP identity resolution by linking anonymous sessions with a userId on sign-up

Professional Development

Career Transition • San Diego, CA • 02/2025-Present

- Self-directed training in JavaScript, SQL, Martech, and CDP platforms; built three projects and earned certifications below

Martech Implementation Mentorship • San Diego, CA • 02/2026-Present

Under the mentorship of a senior engineer (10+ years' experience)

- Configured Google Ads conversion tags, load rules, and Data Values in Tag management platforms (Tealium IQ, GTM, etc.)
- Diagnosed a Meta Pixel conversion failure as a supervised debugging exercise, tracing the issue through debug console and OMNIBUG
- Reviewed SQL and Snowflake schema structure to understand data flow between Martech platforms and the warehouse

Education

Bachelor of Science in Human Biology - University of California, San Diego

CERTIFICATIONS

Google Analytics, Adobe Analytics Foundations, Salesforce Admin (Trailhead Badges), HubSpot Inbound/Digital Marketing, Postman API Beginner, Postman API Testing
